

Spring Seasonal Farm Help for 2027 (May – July)

Grain Farm

We are a straight grain farm operating **2,050 hectares**, actively incorporating **regenerative agriculture practices**. We produce and extract our own compost for seeding and spraying and are committed to improving soil health and plant resilience.

The right candidate will work closely with:

- Compost production and extraction
- Seed inoculation
- Farm field trials
- SAP analysis

This position offers hands-on learning and a deep introduction to **regenerative agriculture** in a real-world farming operation.

We are looking for someone with:

- Agricultural apprenticeship **or at least 2 years of relevant work experience**
- Intermediate English communication skills
- Valid **Class 5 driver's license**
- Ability to work well in a team **and independently**
- Strong work ethic and reliability
- Organized, clean, and detail-oriented work habits
- Good common sense and problem-solving skills

What we offer:

- Practical experience in regenerative agriculture
- Opportunity to learn composting, biological inputs
- Supportive team environment with hands-on mentorship
- Accommodation and 2 meals a day
- Competitive wage
